AM DOOR LOOP

AM CONCEALED SYSTEMS

Concealed AM (Acousto-Magnetic) system designed to keep store aesthetics unchanged and undisturbed while keeping merchandise protected. The DOOR LOOP system is an NG (Next Generation) product line that is suitable for protection of standard retail exits in stores that prefer not to have standard pedestals.

The door loop is mounted on or inside a compatible door frame, creating a large security field encompassing the exit. Slim receivers are attached on the sides, acting as detectors and alarm indicators. Our powerful AM Controller completes the package, enabling the same great features and performance of our AM pedestal systems while maintaining low signal emissions compared to competing products. A single controller can power two separate door loops, or exits.

The AM LOOP system can also be connected to the StoreMonitor cloud or upgraded with wireless communication for easy data collection and maximum security.
