

# AM HAND-HELD DETECTOR

## ACCESSORIES

The AMERSEC® AM (Acousto-Magnetic) handheld detector securely detects 58 kHz adhesive labels and security tags within 15 cm. Designed for security personnel and for shop assistants that need to check what triggered a pedestal alarm while respecting their customer's privacy.

The AM handheld detector helps you find the source of an alarm quickly and discreetly. Nobody desires their personal bags to be searched through. With our device, this can be eliminated. Most customers are also interested to know what caused the alarm and will be grateful if you can sort this out for them with a quick scan.

### Features & options:

- Contactless detection
- Detection of forgotten AM labels and tags at the exit
- Inspection of inventory that can include source-tagged items
- Detection distance is up to 15 cm for adhesive labels
- Lasts up to one month per charge
- Compatible with all 58 kHz tags and labels
- Battery low-level indication
- Audio and visual indication of tag detection
